VALUE-ADDED SERVICES

In addition to lowering total cost, Coastwide offers an array of services that provide extra value when you do business with us. But these services are provided to our customers at no extra cost.

Lowest Total Cost

Lowest total cost is more than just low price. It means being lower on the sum total of all the costs associated with the custodial maintenance items that we provide you. These include reporting, training, on-line ordering, planned equipment maintenance, stockless programs, electronic invoicing and commitment to sustainability.

Management Information Reports

Usage reports help managers control budget dollars effectively by providing quarterly and yearly information on quantity, price, total usage, and frequency. Performance report lets you see if Coastwide is meeting your needs by giving total purchase dollars, average order size, and fill rate. Facility Analysis & Supply Tracking reports provide you with purchasing date that can be used for cost comparisons.

Certified Maintenance Equipment Repair

We offer full-service equipment repair with both on-site and in-house service capabilities to reduce total cost. Also available is a planned maintenance service program designed to catch potential problems before they occur while minimizing the operator's costly downtime for an additional cost. We provide service and repair on all major brands of equipment.

Premier Pages™

Coastwide's Premier Page program is a customized, real-time, Internet-based information and ordering system. Provides many features including 24-hour password protection, permission-based ordering, quick form for easy ordering, check item availability and your price on all items, and detailed monthly expenditures and invoice history.

Stockless/Single Source Programs

Stockless Programs focus on eliminating costs from the supply chain while improving service levels and remove need for additional needed warehouse space. You can rely on Coastwide to provide all your custodial maintenance supply needs in one delivery and save you money at the same time.

Training

Coastwide has developed more than thirty training programs for facility maintenance. These programs focus on safety, products, and preferred processes for accomplishing various cleaning and maintenance tasks. We also provide personalized on-site training.

COMMITMENT TO SUSTAINABILITY

We will be our customers' lowest total cost supplier of sanitary maintenance products, information and technology.

We will be recognized as the sustainability market leader in formulating our own chemicals and in distributing jan-san products manufactured by others.

We will grow by finding enjoyment in our work and by sharing a commitment to sustainable practices, continuous quality improvement and total customer satisfaction.

We will all share in the financial rewards as we become the best long-term growth partner for our customers and our suppliers.

SUSTAINABLE EARTH by Staples

Coastwide manufactures a full line of green cleaning products for commercial, industrial and institutional applications. The Sustainable Earth product line has received Green Seal certification and garnered approval from the EPA for their Design for the Environment Program (DfE).
