

## Thermoplastic Amplifier™

The ready-to-use mop-on restorer for use on finishes maintained with high speed and ultra high speed equipment

MFG #	Description	Size	Units per carton
CEB5801	Thermoplastic Amplifier™ Mop-On Floor Finish and Restorer	Gallon	4 GL/CT

### Features

- UL listed as to slip resistance
- Universally compatible with most finishes
- Prolongs finish life
- Penetrates and fuses finish coats
- Coverage up to 6,000 sq. ft. per gallon
- Low odor, water based formula
- Excellent water and chemical resistance
- Instant "wet look" response on any high speed finish
- Resists black marking
- Excellent soil resistance
- Does not build up
- Improves water resistance of most finishes
- No petroleum solvents including odorless mineral spirits
- Mop on, let dry and burnish to a high shine

## Thermoplastic Amplifier™ Mop-On Floor Finish and Restorer

A new technology in which a heat-sensitive copolymer bonds to the acrylic polymer base coats through high speed buffing. Creates a highly durable shield that resists scuffing, black marking and abrasion. The result is a deep, "wet-look" gloss with excellent antislip properties. Unlike additional coats of finish, it does not have a tendency to build up. One gallon generally covers about 6000 square feet when mopped on. Also used as a spray buff.

---

### Physical Data

Physical form: opaque, light blue liquid  
Odor: pleasant  
pH: 8.5  
Film color: clear  
Freeze/thaw stability: three full cycles  
Shelf life: 2 years in original unopened containers  
Odor index: low

### Performance Data

Specular gloss (60°): 95 minimum after burnishing  
UL listed: classified by underwriters laboratories as to slip resistance  
Water resistance: excellent  
Detergent resistance: excellent  
Removability: easy to remove with conventional non-butyl wax stripper  
Burnish response: immediate and brilliant
