

# ICE AWAY™

## SNOW & ICE MELTER WITH CORROSION INHIBITORS

**WILL NOT HARM TREES, SHRUBS OR LAWNS  
WHEN USED AS DIRECTED**

**USE FOR ICE REMOVAL ON SIDEWALKS & PARKING LOTS,  
FOR SCHOOLS - STORES - OFFICE BUILDINGS -  
HOSPITALS AND NURSING HOMES**

**CAUTION: KEEP OUT OF REACH OF CHILDREN / FOR INDUSTRIAL USE ONLY**

### **Fast Working: Melts to -20° F / -29° C**

Specially formulated ingredients in Ice Away™ with Meltium® and Calcium magnesium acetate (CMA) act quickly and effectively melting snow and ice even under extreme conditions. Ice Away™ provides a slip-resistant surface on sidewalks, driveways, loading docks, parking lots and other exposed areas. Surfaces are always safer for both pedestrian and vehicular traffic after Ice Away™ has been applied.

### **Directions for Use**

Sprinkle uniformly on ice and snow at the rate of 1 to 4 lbs. Per 500 square feet as needed after removing as much snow and ice as possible. If applied at the beginning of a storm, Ice Away™ with Meltium® and CMA makes snow removal much easier. Apply at a uniform rate. Do not use excessive amounts. Re-apply product as needed to maintain sufficient brine solution to prevent refreezing while wet.

**Note:** Do not use on concrete less than one year old or that was not properly mixed, finished and cured. Flaking or spalling of poor quality concrete may occur when using any ice melting product. Quality concrete is air entrained, mixed and cured according to recommendations of the American Concrete Institute Committee's sections 305, 306 and 308.

### **Safer for Vegetation**

When product is applied as directed, Ice Away™ will not harm lawns, trees, shrubs or other vegetation. To enhance plant growth and minimize any damage, flush and soak soil thoroughly around heavy usage areas in early Spring.

### **Safer Means Nontoxic**

Nontoxic to children and animals when Ice Away™ with Meltium® and CMA is applied as directed. NSF authorized.

### **Safer on Concrete and Metal**

Special additives minimize spalling (flaking and pitting) on cured concrete when Ice Away™ with Meltium® and CMA is used as directed. Corrosion of metal is reduced because of special corrosion inhibitors.

### **Safer on Leather**

Leather shoes, gloves and other products are not damaged when exposed to Ice Away™ with Meltium® and CMA. By comparison, use of calcium based salts can result in damage to shoes and leather products.

**Net Wt.  
50 lbs.**

# ICE AWAY SNOW & ICE MELTER

## Information Sheet

### 10 REASONS TO CHOOSE COASTWIDE'S ICE MELTER

1. *Ice Away* has patented synergistic formula that is safe for use on concrete and metal.
2. *Ice Away* uses the ability of brine to effectively melt snow and ice. This snow and ice melter works better because they work by maintaining a high brine solution and not just by the releasing of heat. This maintains effectiveness and eliminates the need for additional material.
3. *Ice Away* creates instant traction, which makes for safe walking surface.
4. *Ice Away* is very safe. It is less toxic than baking soda. *Ice Away* contains no dangerous chemicals. It can be handled safely with bare hands. 100% non-toxic to children and pets. NSF Approved for Food Service.
5. *Ice Away's* pink colored granules reduce the possibility of over-application, the major cause of tracking problems. *Ice Away* with is safe on carpets and floors. Leaves no oily residue.
6. Unlike many other ice melters, *Ice Away* contains an anti-corrosive chemical to help fight corrosion of exposed metal. It also contains anti-caking agents.
7. *Ice Away* will not harm **trees, shrubs, lawns or other vegetation** when used as directed. It has vegetation enhancers and protectors in the formula.
8. *Ice Away* is very economical to use. If used according to label directions, you will use less product per sq. ft. than most other ice melters on the market.
9. *Ice Away* is effective in temperatures -20° F below zero and can be stored up to 24 months and still be effective.
10. *Ice Away* CMA registered for an environmentally safer product.
