

TECHNICAL DATA SHEET

ICE ZAPPER™ ICE MELTER

- Effective to -20°F (-29°C)
- Special Formula Inhibits Corrosion
- Safer to Use Around People, Pets and Vegetation
- Pink Color for Controlled Application
- Excellent Shelf Life

Description: Specifically formulated ingredients in Ice Zapper™ Ice Melter act quickly and effectively to melt snow and ice even under extreme conditions. This lab developed ice melt is safer to use around people, pets, and vegetation. The special formula is non-corrosive on concrete and metal and provides a slip-resistant surface on sidewalks, driveways, loading docks, parking lots, and other exposed areas.

Directions: Before application, remove as much snow and ice as possible. Sprinkle Ice Zapper™ Ice Melter uniformly on remaining snow and ice at the rate of 1 to 4 pounds per 500 square feet (this application would depend on the amount of snow and ice present). Applying Ice Zapper™ Ice Melter at the beginning of each snowstorm makes snow removal much easier. Apply at a uniform rate. Do not use excessive amounts. Pre-apply product as needed to maintain sufficient brine solution to prevent refreezing while wet. When product is applied as directed, it will not harm lawns, trees, shrubs, or other vegetation. To enhance plant growth and minimize any damage, flush and soak soil thoroughly around heavy usage areas in early spring.
